

Minutes - 2229 Main St. Committee meeting –June 10, 2014

Present: R. Bruttomesso, P. Rockwell (Chair), F. Seward, S. Verrill

Minutes from five meetings were reviewed and approved: 10 Sept 2013, 10 Dec 2013, 14 Jan 2014, 8 Apr 2014, and 13 May 2014. Fred will send these to K. Byrne for posting.

Pam summarized the present EPA schedule. Melissa is waiting for EPA approval of the proposed plan for remediation. She then has to add comments and release the plan and feasibility study. There will then be a public meeting and a 60-day interval for comments from the public. After this, Melissa will decide on the remediation plan and write the Record of Decision. We will probably review this in the Fall.

We again discussed possible fire hazards in the process of duct cleaning and removal. We noted that air monitoring at the site perimeter is now in operation and that our 1999 air-monitoring report was now digitized and will be posted.

We discussed documents available in the Concord Library. Most EPA documents that we have seen have been in the form of a draft and hard copy is not yet available. Although much material is available on the web, we thought the maps in the printed documents were worth having.

The meeting was adjourned at 8:30

Respectfully submitted,
Fred Seward
