

Minutes - 2229 Main St. Committee meeting – 03 February 2010

Present: P. Boehm, R. Bruttomesso, L. Rappoli, P. Rockwell (Chair), F. Seward

We reviewed a report written by P. Rockwell summarizing our comments on the draft of the EPA document, “Baseline Human Health Risk Assessment - First Interim Deliverable”. There were some changes concerning detectability of VOCs but, overall, we were satisfied with the content.

Minutes of last meeting were reviewed and approved.

We discussed the inhalation exposure risk and ended talking about removal of the buildings. Unresolved questions are: When will the removal start? How much of slabs will be removed?

The meeting was adjourned at 9:00.

Respectfully submitted,

Fred Seward
